

Rauland

Nurse call solutions as responsive to staff as they are to patients—for more efficient, more effective patient care.

AMETEK[®]

Rauland  **Responder**
Global Innovations. Delivered Locally.

An engaged, satisfied nursing staff can provide improved, more efficient care. Rauland specializes in meeting the real needs of healthcare professionals who face heavy patient loads, compliance mandates, critical time-frames and ever-changing technology. Installed in more than 1 million acute care beds in 40 countries across the globe, our intelligent nurse call solutions are designed for a very focused objective: more responsive, safer, better patient care.

100% scalable solutions keep work—and communication—flowing.

Readily customized to specific environments and challenges, Responder[®] goes beyond simple nurse call to include key team members and multiple departments across the hospital. Responder helps you reduce errors, improve performance, ensure rounding, and eliminate wasted time and effort.

Connect staff and their patients
with the best possible care –
connect with Responder[®].

Deliver the best possible care with the intelligent Responder 5 communications and workflow solution—help foster a more productive staff and improve patient satisfaction.

Responder 5 allows nursing staff to work with greater efficiency and harmony with their patients to help your care be the best it can be.

Patient Safety

Ensuring the safety of patients and preventing potential dangers to their well-being is your top concern. Responder 5's intelligent solutions for workflows, reminders, visual alerting, and 2-way communications help you achieve that goal.

More Satisfaction

Responder 5 gives your patients a voice, allowing you to respond faster to their needs with more accuracy and efficiency. Staff satisfaction can also improve when caregivers are given the tools they need to do a better job – automating their processes and documentation and ensuring calls receive the appropriate level of response.

Streamlined Workflow

Straightforward connections at every touchpoint of care can give patients the most effective care possible – making reporting easy to understand, act upon, and customize, while responding quickly and effectively to needs and requests.

Critical Reporting

Get the data you need to make decision-making easier. Responder 5's sophisticated reporting packages seamlessly gather data for easier decision-making, tracking of key performance indicators, and customizing specific reports.

Competitive Edge

By leveraging technology to help prevent missed care, Responder 5 can create greater efficiencies, improve productivity, and automate evidence-based practice strategies.

Responder 5 connects every touchpoint

MED-SURG

Fall Prevention

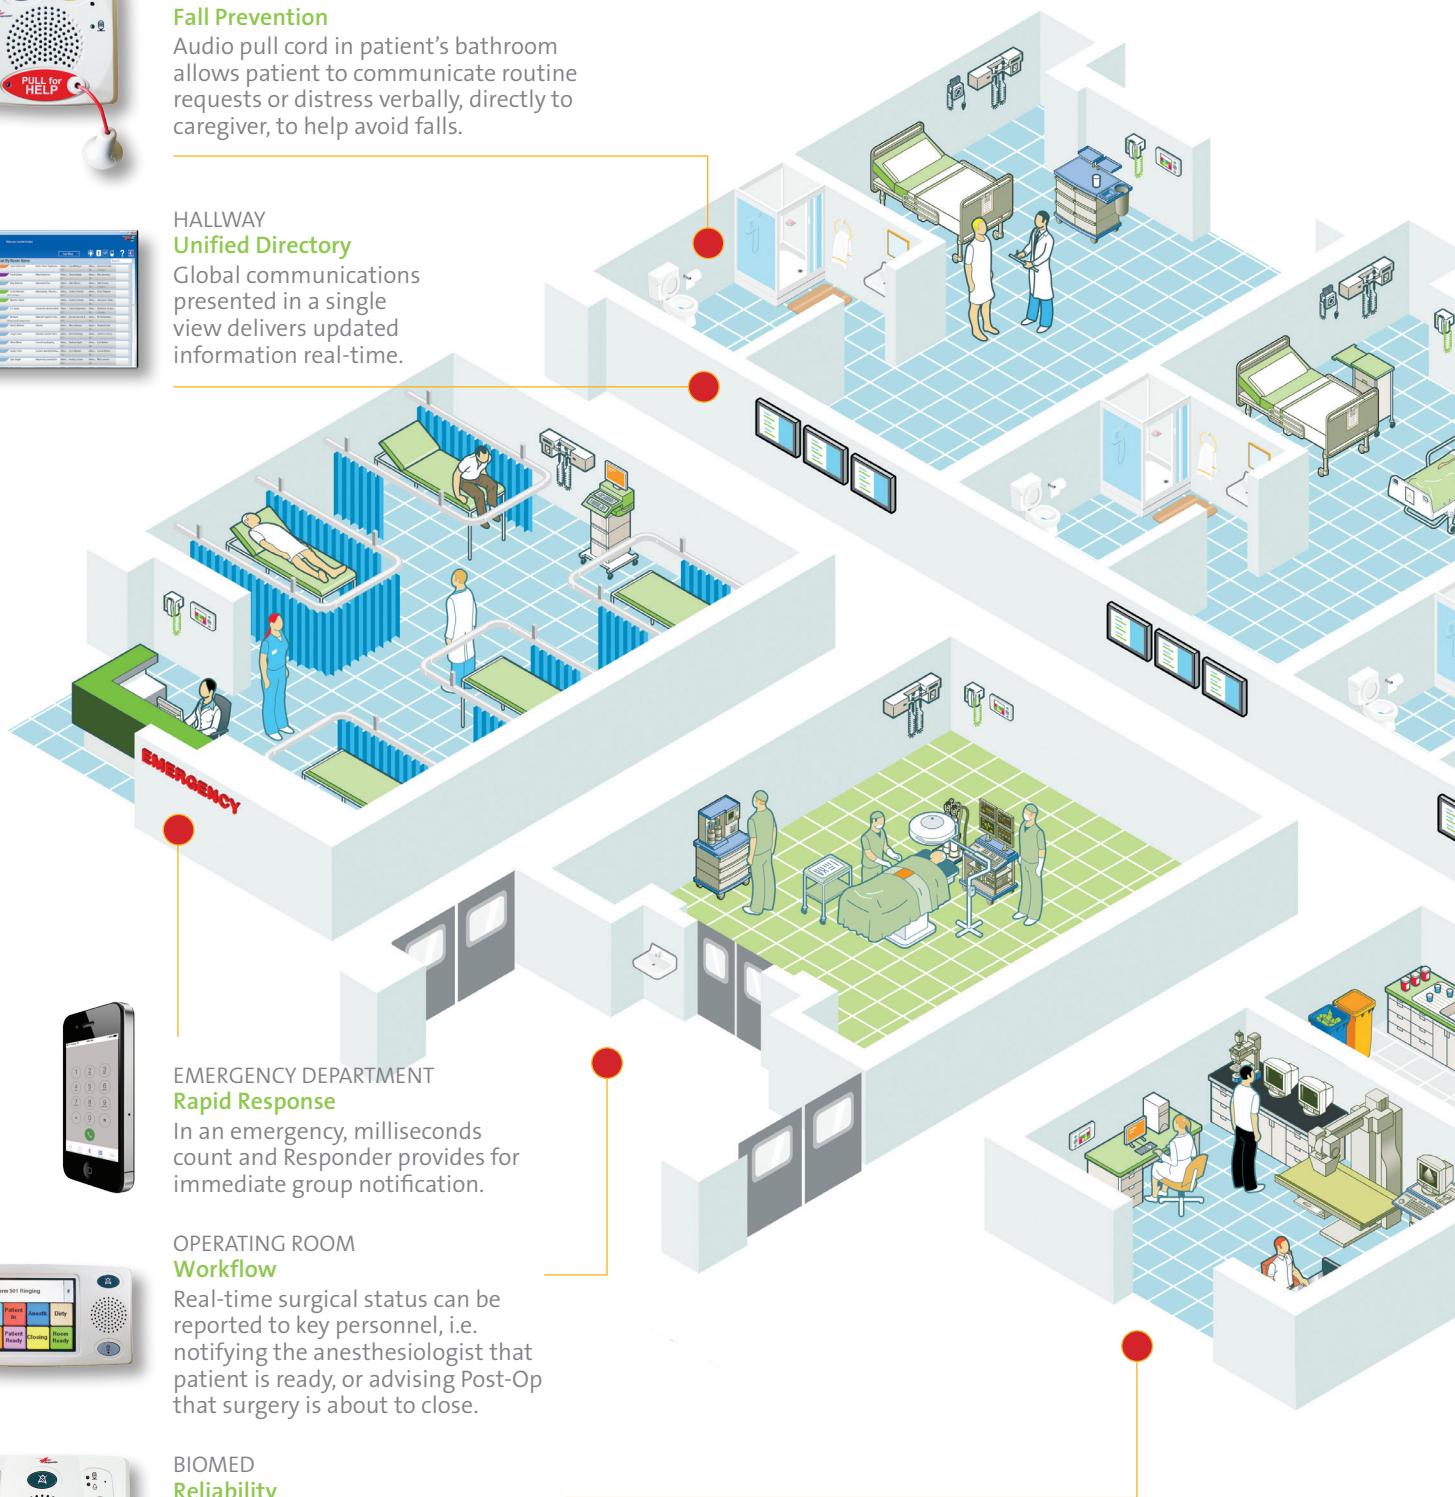

Audio pull cord in patient's bathroom allows patient to communicate routine requests or distress verbally, directly to caregiver, to help avoid falls.

HALLWAY

Unified Directory

Global communications presented in a single view delivers updated information real-time.

EMERGENCY DEPARTMENT

Rapid Response

In an emergency, milliseconds count and Responder provides for immediate group notification.

OPERATING ROOM

Workflow

Real-time surgical status can be reported to key personnel, i.e. notifying the anesthesiologist that patient is ready, or advising Post-Op that surgery is about to close.

BIOMED

Reliability

Responder's robust performance offers innovative features and minimally disruptive maintenance and troubleshooting—all with a 5-year warranty.

Point of care throughout your facility.

ALLTOUCH® FOR EMR
2-way documentation
Document patient care to the EMR automatically, as it happens. Transmit patient status changes from EMR directly to Responder corridor light and census swoops to heighten awareness

MED-SURG
Rounding
Reminders programmed for recurring check-ins can be easily sent via wireless phones to help improve patient care and increase patient satisfaction scores.

MED-SURG
Bed Events
Integrated bed exit alarms and lights in the corridor identify patient fall risks to help minimize patient falls.

Microsoft®

IT
Open Architecture
Using an open architecture framework, Responder integrates seamlessly with hospital servers and within data centers, remotely or locally.

CALL CENTER
Code Blue
Call management across departments and staff can be centralized, de-centralized or a mix of both to ensure calls are answered immediately.

NURSE MANAGER
Reporting Advantage
Gather meaningful data real-time, about staff workflow and performance, response times and frequency of activities to allow tracking, analysis and custom views.

ENVIRONMENTAL SERVICES
Room Turnover
Summon EVS with the touch of a button to clean room, notify nursing staff when ready, and report room turnover time.

NURSING STATION
Improved Efficiency
Sync all staff assignments across multiple systems to eliminate multiple sign-ons.

Visit Us at Our Solution Center

The 40,000 sq. ft. Rauland Solution Center near Chicago presents a complete, collaborative hospital experience for customers. Each area is fully equipped with interactive Responder hardware and software components, allowing customers to review products in hands-on environments simulating Emergency Room, Operating Room and Patient Care rooms.

Service and Support: Our Specialty

Service, installation, training and technical support for Responder systems are delivered locally 24x7 through our international network of expert, certified distributors, with support from a team of 70 on-staff Rauland engineers.
