

Optimizing Clinical Care for Acute Care Facilities

Responder® Enterprise is a sophisticated solution that will improve your workflow to help you provide the best care possible for your patients. As a care provider, you can't be everywhere at once and Responder Enterprise helps to identify what is needed, where and when, so that patients are cared for most effectively. Responder Enterprise's powerful user interface includes near real-time dashboards and a clinical mobile application that will streamline and simplify the daily workflow across your entire acute care facility for improved processes, communications and – most importantly – patient outcomes.

ENTERPRISE HELPS YOU DELIVER THE BEST CARE

We understand the daily challenges of an acute care facility when it comes to managing a limited staff without sacrificing quality of care. Responder Enterprise offers the tools and analytics that give you the insight you need to identify the best practices and standardize those across all service lines at your hospital. Responder Enterprise provides the insights you need to realize your vision.

Responder Enterprise helps deliver:

- Reduced response times
- Improved patient outcomes and satisfaction
- Increased efficiencies that eliminate alarm fatigue
- Robust reporting and analysis
- Security and reliability
- Measurable return on investment

THE NEXT GENERATION
OF CONNECTIVITY AND
TOOLS FOR IMPROVED
PATIENT OUTCOMES

Rauland Responder® Enterprise – the best-in-class product in nurse call technology – is specially designed and customized for acute care hospitals. All with an easy-to-use interface that features intuitive tools and mobile solutions.

Clinical Mobile App

Smartphone App enables patient-to-staff requests and staff-to-staff communication via voice and secure messaging.

Rauland EveryWear™

Real-time location system that includes wearables and tags to that locate staff and monitor equipment for improved care and productivity.

Centralized Call Activity Board with Audio Dispatch

Enables a defined set of requests from the whole hospital to be triaged from a PC using a headset that allows the operator to talk to the patient.

UNLIMITED CAPABILITIES THAT MAXIMIZE LIMITED RESOURCES

Responder Enterprise offers a best-in-class value with solutions based on your facility's data. With Responder Enterprise you will optimize your clinical setting with streamlined workflows and enhanced staff communication that boosts efficiencies and care delivery.

Enhanced Care

- Enable caregivers to identify patients with higher needs to balance staffing
- Better connect with patients to provide verbal support and offer reassurances
- Ensure only the best nursing care is provided through reminders, automation and improved communication

Clinical Insights

- Powerful daily huddle board allows direct care clinician to identify needier patients on their unit
- Instantly see the status of every patient, their immediate needs and next steps with real-time dashboards and email reports
- Review insights to see what's working and what's not and focus on specific KPIs including fall rates, call times and rounding compliance
- Gain greater visibility into performance and staffing to help improve workflows and efficiency

Streamlined Workflows

- Avoid a steep learning curve with easy-to-use technology that operates within current systems
- Streamline and simplify the daily workflow and reduce alarm fatigue with intuitive user interfaces and mobile solutions
- Reduce training time and help staff move more easily between units
- Locate staff and needed equipment easily

Protected Patient Privacy

- Rest assured that patient data is secure and encrypted
- Avoid security breaches and limit downtime with a system that is scalable and adaptable to your team and facility
- Receive local delivery with on-site support, service and training

Augmented Features for Today's Acute Environment

- Utilize valuable add-ons designed to make daily activities and staff care easier including a mobile app, staff and patient location contact tracing with Rauland EveryWear, and measurable healthcare workflow tools analytics with Rauland Enterprise Converge technology

A Powerful Yet Elegant and Insightful Solution that Delivers Big Value

It's time to improve the clinical care you offer patients while enhancing the daily workflow for you and your staff. Responder Enterprise offers an easy-to-use, secure, powerful, flexible and insightful solution designed to provide value to any acute care facility. With Responder, you'll be ready for whatever the future holds, and you'll impact what matters most – patient care.
