

Arial® Wireless Call Station

NEW, modern aesthetic ideal for new buildings or updating existing communities—with the same peace of mind for resident living spaces

ABOUT

The Arial Call Station is a wireless call device installed inside resident living areas as well as common areas. When a resident activates the Arial Call Station, a message is sent to the Arial solution for staff response.

BENEFITS

- Thinner, less obtrusive case design
- Staff Presence feature can help to more accurately measure staff response time and care time spent
- Can be installed directly to wall or over single gang wall box

- Anti-microbial string cleans easier
- Accessory cover for environments with ligature point restrictions
- UL 2560 and UL 1069 available
- Moisture resistant version available
- 1/4" accessory jack for connection of wide range of call cords

THREE WAYS TO CALL

Trigger an alarm by pressing a large button, pulling a cord or using a remote push-button (optional).

CHECK-IN FUNCTION

Residents “check in” using the dual-purpose Call Cancel/Check-in button, allowing caregivers and operators to stay aware of a resident’s activity, reducing the frequency of rounding and limiting disruption.

WIRELESS INSTALLATION AND EASY MAINTENANCE

Requiring no cabling, this wireless, battery-operated call station is simple to install and to relocate at any time.
